Specification Sheet

King Midas Special

Description

King Midas Special, enriched, malted is the food prepared by grinding and bolting cleaned wheat other than durum. The particle size shall, under appropriate sieving, test no less than 98 % through a woven wire cloth designated, "212 microns or US standard sieve 70". The flour is freed from bran coat and germ and shall meet the moisture, ash and protein specifications as listed below. The flour is produced in accordance with good manufacturing practices and all applicable FDA regulations as amended.

Ingredient Listing

Enriched Flour (Wheat Flour, Malted Barley Flour, Niacin, Reduced Iron, Thiamin Mononitrate, Riboflavin, Folic Acid).

Properties

Condition	Dry, free flowing
Odor	Natural, no off odors

Extraneous Matter

Product has been cleaned of wood, stones, and other foreign matter
Product has been screened with metal detector to eliminate metal particles.

Analysis

Moisture	Maximum 14.0 %
Protein (14% moisture basis)	12.6 +/- 0.3%
Ash (14% moisture basis)	0.54 +/- 0.03%

**Enriched value is 4.41 mg.*

*** AOAC approved methods. Composite commercial samples. These assays represent guidelines for product formulation, and were run on a random basis. Varietal and growing conditions (weather and soil) can have an effect on these values.*
